## Dimensions

Width = 116cm / Depth = 110cm / Height = 145cm

## Operation

New Software designed to give Ultimate flexibility with Manual and Auto controls. Manual settings and operation to allow users to handle very specific products such as Heat Exchangers that require cleaning – can be filled with solution at top of cycle; mixed for several minutes and then locked in bottom position to allow for emptying product. New software design allows ultimate controllability with full safety features built in.

### Operational Paramètres

- ✓ Home Position
- ✓ Fill exchanger with solution
- ✓ Start cycle- run for several minutes at desired speed
- ✓ Stop at opposite of Home position (bottom) cradle locked- drain exchanger
- ✓ Return to Home position – Refill with clean fluid and restart cycle again!

We utilise the same Electrical control systems on all products so that we have full inter-changeability; Best Reliability in Market; Ultimate Flexibility in Programming ; Best Solution Provider in Market.
